### Career Summary - 20 years working with the world's leading software companies

The focus of my career in the software industry has been enterprise solution design and delivery. From leading the pre-sales play to managing professional services teams, I have delivered quality outcomes for the customer and the business.

My global industry experience ranges from working with the United Nations, government organizations and local councils. Across the private sector my customers have included Australian primary industries, Swiss financial services and US pharmaceutical companies.

My industry skill set includes solution architecture, thought leadership, professional services, technical delivery, team leadership, and training.

### Career History – Salesforce MuleSoft, Adobe, Oracle, Autonomy, Coca-Cola

| From     | To       | Company                       | Role                            |

|--|------------------------|
| MuleSoft Anypoint Platform (orchestration) | Salesforce Communities |
| MuleSoft Anypoint MQ (choreography)        | Salesforce CPQ         |

### Adobe product suite:

|  |                                      |
|--|--------------------------------------|
| Adobe Experience Manager Sites (DX/CX) | Adobe Experience Manager Forms       |
| Adobe Experience Manager Mobile        | Adobe Experience Manager Screens     |
| Digital Asset Management               | Adobe Experience Manager Communities |
| Adobe Analytics                        | Adobe Target                         |
| Adobe Managed Services                 | Adobe Campaign                       |

### Oracle product suite:

|                                   |                             |
|-----------------------------------|-----------------------------|
| WebCenter Sites (DX/CX)           | Mobile Cloud Service        |
| Oracle Commerce Cloud             | WebCenter Content (EDRMS)   |
| Business Process Management (BPM) | WebCenter Social / Mobility |
| Process Cloud Service             | WebLogic                    |

### Autonomy (now HPE/Microfocus) product suite:

|   |  |
|---|--|
| Autonomy Enterprise Search                  | Autonomy EDRMS                         |
| Autonomy Process Automation (BPM)           | Enterprise Archive Services            |
| Autonomy Enterprise Data Capture (TeleForm) | TeamSite Content Management            |
| LiquidBPM Orchestration Engine              | iManage Intelligent Content Processing |

### Databases, languages, scripts, methods

|                                   |                              |
|-----------------------------------|------------------------------|
| Microsoft SQL Server              | JavaScript                   |
| Oracle Database                   | Visual Basic for Application |
| Microsoft Visual FoxPro           | HTML                         |
| Java                              | XML                          |
| .NET (Visual Basic)               | WebServices                  |
| Linux OS                          | Windows OS                   |
| DevOps/CICD                       | Togaf 9.2                    |
| Security (starting CISSP journey) | Prince2                      |

### Additional Information

- Dual British and Australian citizenships
- Full and clean New South Wales driver's license
- Held clearances in the UK (I built the DVA platform) and eligible to apply in Australia
- Hiking and winter sports enthusiast – longest hike so far; 400ish kilometers
